

AUTHOR RESPONSIBILITIES & PUBLICATION ETHICS

Global Journal for Progressive Innovation and Research (GJPIR)

The Global Journal for Progressive Innovation and Research (GJPIR) is committed to upholding the highest standards of publication integrity and ethical conduct. All authors submitting manuscripts to the Journal are expected to follow established norms of academic honesty, transparency, and responsibility. These guidelines align with the principles of major global ethics bodies, including the Committee on Publication Ethics (COPE) and the International Committee of Medical Journal Editors (ICMJE).

Authors must ensure that all submitted work is entirely original and has not been previously published or under consideration elsewhere. Proper acknowledgement of others' work is mandatory, and plagiarism in any form—including self-plagiarism, duplication, or fabrication—is strictly prohibited. Submissions found to violate originality or plagiarism standards may be rejected immediately.

Manuscripts must present accurate, complete, and transparent research findings. Authors are responsible for reporting data truthfully without fabrication, falsification, or manipulation. All methods, data, and analyses should be clearly described to allow replication.

Authorship must be limited to individuals who have made substantial contributions to the conception, execution, or interpretation of the study. All listed authors should approve the final manuscript. Guest, ghost, or honorary authorship is unacceptable. The Journal recommends using the CRediT taxonomy to clarify author roles.

Authors must disclose any financial or personal conflicts of interest that may influence their research. Funding sources and institutional support should also be acknowledged transparently. Ethical approval must be obtained for studies involving human participants, animals, or sensitive data, and must be stated in the manuscript.

The views, opinions, interpretations, data, and conclusions expressed in published articles are solely those of the authors and do not necessarily reflect the views of the Editor-in-Chief, Editorial Board, reviewers, publisher, or affiliated institutions of the Global Journal for Progressive Innovation and Research (GJPIR). While the Journal undertakes reasonable efforts to ensure the integrity of the peer-review and editorial process, it does not accept responsibility for the accuracy, completeness, or reliability of the content published. The authors remain fully responsible for their work, including any ethical, legal, or factual issues arising from it.

Unless otherwise stated, authors submitting manuscripts to the Global Journal for Progressive Innovation and Research (GJPIR) retain the copyright of their work. By submitting and upon acceptance, authors grant the Journal a non-exclusive license to publish, reproduce, distribute, and archive the work in print, electronic, and other formats for scholarly and academic purposes. Authors are responsible for obtaining necessary permissions for any third-party copyrighted material used in their manuscripts and for appropriately acknowledging such material.

Any disputes, claims, or legal matters arising out of submissions to, publications in, or association with the Global Journal for Progressive Innovation and Research (GJPIR) shall be subject to the jurisdiction of the competent courts in India.

Authors are responsible for maintaining the confidentiality of data, protecting participant privacy, and ensuring responsible research conduct. If errors or inaccuracies are discovered after publication, authors must promptly notify the Journal so that corrections or retractions can be issued.

All submissions must follow GJPIR's formatting and structural guidelines. The Journal uses a double-blind peer-review process, and authors must avoid any actions that compromise reviewer anonymity. Revised manuscripts must include a detailed response to reviewer comments.

GJPIR adheres strictly to COPE guidelines and reserves the right to investigate potential misconduct. Proven cases of plagiarism, fabrication, falsification, or ethical violations may result in manuscript rejection, publication retraction, author bans, or institutional notification.

By submitting a manuscript to GJPIR, authors acknowledge that they have read, understood, and agree to follow these ethical responsibilities. The Journal expects authors to uphold academic integrity and contribute to a trustworthy scholarly community.
